Professional Summary

Accomplished Data Analyst adept at transforming complex datasets into actionable insights. Proficient in data visualization, statistical analysis, and SQL. Skilled in identifying trends and presenting findings to drive informed business decisions. Experienced in Python and Excel for data manipulation and reporting.

Education

- Masai**
Data Analytics
Sep 2024 – Apr 2025
- Lovely Professional University**
B.Tech (Computer Science & Engineering)
Jul 2019 – Jul 2023
- A.N.S. College**
Intermediate in Science
Apr 2016 – May 2018
- High School Ajgara**
Matriculation
Mar 2015 – Mar 2016

Certifications

- Masai**
48-Hour Hackathon Participation

Projects

- ML Model Comparison Dashboard** | *Python, Streamlit, Machine Learning*
 - 🔗 **Deployed Link** : <https://ml-model-comparison-dashboard.streamlit.app/>
 - 🌐 **Github Repo** : <https://github.com/nikhil9276/ML-Model-Comparison-Dashboard.git>
 - Developed an interactive dashboard to compare machine learning classification models based on accuracy, precision, recall, and F1-score.
 - Generated detailed classification reports for comprehensive model performance evaluation.
 - Implemented confusion matrix visualization to showcase class-wise performance metrics.
 - Enabled side-by-side comparisons of multiple models for easy evaluation by users.
 - Delivered final insights highlighting top-performing machine learning models using Python, Streamlit, and machine learning techniques.
- Indian Electric Vehical Analysis Dashboard** | *Python, Plotly, Streamlit*
 - 🔗 **Deployed Link** : <https://indian-ev-market-dashboard.streamlit.app/>
 - 🌐 **Github Repo** : <https://github.com/hema2781/Indian-EV-Market-Dashboard>
 - Led data cleaning efforts for the Indian EV Market Dashboard project
 - Collaborated with team members to develop an interactive visualization using Python, Plotly, and Streamlit
 - Analyzed and presented key performance indicators (KPIs) of the overall EV market
 - Contributed to the design of top 10 manufacturer analysis and market share visualizations
 - Supported operational charging station analysis for informed decision-making
- Business Insights Dashboard** | *Python, Excel, Power BI, SQL*
 - 🌐 **Github Repo** : <https://github.com/nikhil9276/SQL-Sleuths.git>
 - Communicated insights effectively through interactive Power BI dashboards, facilitating informed decision-making by stakeholders.
 - Maintained a high level of professionalism by managing deadlines and delivering a robust business insights tool within a dynamic work environment.
 - Adapted to changing priorities by incorporating new metrics and features based on evolving business needs.
 - Demonstrated strong organizational skills by ensuring a detailed and comprehensive visual representation of sales data.

Skills

Technical Skills: SQL, Python, Power BI, Excel, Machine Learning, Web Scraping

Soft Skills: Adaptability, Teamwork, Effective Communication, Problem Solving
